THE CHANGED ATTITUDES

• REGARDING 'GENDER IDENTITY'

• *Terminology Ignores Biology, Science, & Medicine*

“Sex refers to biological differences between males and females. For example, chromosomes (female XX, male XY), reproductive organs (ovaries, testes), hormones (oestrogen, testosterone). *Gender* refers to the cultural differences expected (by society / culture) of men and women according to their sex. A person’s sex does not change from birth, but their gender can.”

THE CHANGED ATTITUDES

- REGARDING 'GENDER IDENTITY'

- *The APA On 'Gender Dysphoria':*

“Gender dysphoria involves a conflict between a person's physical or assigned gender and the gender with which he/she/they identify. People with gender dysphoria may be very uncomfortable with the gender they were assigned, sometimes described as being uncomfortable with their body (particularly developments during puberty) or being uncomfortable with the expected roles of their assigned gender.”
